## **DETAILED ACTION**

### **REASON FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 25-36 is the inclusion of the method steps being controlling a feeding rate of ink for each of areas corresponding to ink keys by comparing measurement information and reference information on detecting patches printed on prints; determining an average image area ratios of images in the areas on said prints; determining an average image area ratios of images in positions aligned in a printing direction with said detecting patches printed in the areas on said prints corresponding to said ink keys; and correcting one of said reference information and said measurement information based on said average of image area ratios of the images in the areas on sad prints corresponding to said ink keys, and said average image area ratios of the images in said positions aligned in said printing direction with said detecting patches printed on said prints. It is these steps found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shiraishi (U.S. Pat. 6,684,780) discloses a controller that adjusts the aperture of the ink key of each ink-feeding unit on the basis of the correction data, but does not disclose determining an average of image area ratios of images in

positions aligned in a printing direction with the detecting patches printed in the areas on said prints corresponding to said ink keys. Kato et al (U.S. Pat. 6,494,557) discloses a test pattern which has a plurality of patches printed therein and a process of correcting a color deviation caused by output characteristic variations, but does not disclose determining an average of image area ratios of images in positions aligned in a printing direction with the detecting patches printed in the areas on said prints corresponding to said ink keys

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
